

ANJUM IQBAL

Software Engineer

SUMMARY

Highly motivated and logical software engineer. Excels in managing multiple projects and tackling tasks as priorities change. A strong eye for detail and a proven desire to learn.

WORK EXPERIENCE

Software Engineer at 100devs Agency | Los Angeles, CA - Remote

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Continuing professional development with an aim to taking on larger projects within a team
- Currently working on building semantically structured full-stack web applications

Recent Projects:

[Right Way Learning](#) A fully responsive website designed for a private tutor.

[The Skin Clinic](#) A modern responsive site built for a skin therapy clinic.

Current Project: Currently working on a full-stack web application designed for home educators. Parents/carers will log in and use the built-in-tools to plan and assign work to children who will have their own login and dashboard

Web Developer at AI Web Consulting | Birmingham, England

May 2022 — Present

- Creating websites for small Birmingham based businesses and individuals
- Researching and strategizing with clients to choose the most appropriate frameworks and platforms to meet their requirements
- Providing training that enables clients to carry out basic maintenance for their site

Current client: Claire Douglass - A successful Birmingham based artist specialising in large canvases. Requiring a portfolio website with eCommerce functionality in order to take advantage of drop-shipping for an additional revenue stream.

Home Educator | Birmingham, England

September 2002 — September 2022

- Providing a complete grammar level education with a 100% success rate of children gaining grammar school places
- Thorough resourcing, planning and preparing to ensure day-to-day and long-term goals are achieved
- Researching and developing a curriculum suitable for the specific needs of a home-school environment

Product Developer at Cafe Blu | Birmingham, England

January 2018 — August 2020

- Developed recipes and introduced new products that directly contributed to increasing daily revenue by over 400%
- Implemented data-driven strategies to make decisions on product selection and promotion as well as product discontinuation
- Generated documentation for recipes and food management procedures including costing, nutritional and allergen information
